

Cooling tower pack

The records a notifiable cooling tower needs: the logbook, the local-authority notification, water-treatment dosing, and the contractor permit and RAMS.

Includes 4 printable record sheets

- **1. Cooling tower / evap condenser logbook**
An operating logbook for cooling towers and evaporative condensers (HSG274 Part 1), capturing routine checks such as dip slides, biocide dosing, conductivity, pH and visual condition.
- **2. Cooling tower notification record**
A record of notifications to the local authority for cooling towers and evaporative condensers: new devices, changes and decommissioning: under the Notification of Cooling Towers and Evaporative Condensers Regulations 1992.
- **3. Water treatment dosing record**
A record for continuous chemical dosing and secondary disinfection systems (such as chlorine dioxide or copper-silver ionisation), logging setpoints, measured residuals and chemical replenishment.
- **4. Contractor and permit-to-work record**
A record for managing water-hygiene contractors: confirming RAMS, permits to work, competence/LCA assurance and that completed records are returned for your logbook.

Cooling tower / evap condenser logbook

An operating logbook for cooling towers and evaporative condensers (HSG274 Part 1), capturing routine checks such as dip slides, biocide dosing, conductivity, pH and visual condition.
