

The cleaner's part in keeping the water safe: clean it, flush it, report it.

Your water-safety jobs (commonly weekly: follow your schedule)

- ✓ Descale and disinfect shower heads and spray taps
- ✓ Wipe and clear tap aerators and nozzles
- ✓ Run taps and showers in unused rooms

Keep the spray down

- ▲ Take the shower out of use before stripping it
- ▲ Minimise aerosol while cleaning
- ▲ Wear gloves and eye protection

Empty or unused rooms

- ✓ Flush hot and cold before re-letting
- ✓ Run each outlet until the temperature settles
- ✓ Record the date, room and who did it

Report, don't fix

- Tell the responsible person about a warm cold tap
- Flag heavy scale, slime or a dripping head
- An unrecorded clean didn't happen
